

Corporate PRESENTATION

COMPANY BACKGROUND & OVERVIEW

An embodiment of 'Made in India' excellence, Sparsh is transforming the landscape of Indian electronic security manufacturing with over two decades of pioneering innovation. Founded in 2002, Sparsh set out with a bold vision to position India as a global hub for the design and production of advanced security solutions.

The company invests 5-7% of its annual revenue in research and development. Sparsh has technological tie-ups with world leaders in video surveillance to stay ahead of the curve. Known for its expertise in providing tailor-made solutions, Sparsh also has complete range of products that are ER-compliant, in line with the CRO by Ministry of Electronics and Information Technology (MeitY) standards.

CORPORATE VISION

Our vision is to improve security for all and build a comprehensive portfolio of video surveillance security solutions that serve customers globally.

CORPORATE MISSION

To empower every organization and individual in the world to create a secure environment for their customers, employees and loved ones by focusing on customer-driven innovation and sustainable production. We seek to continually advance our technology, ease of use, and relentless execution to reduce cost and increase value

From Idea

VISIONARY LEADER

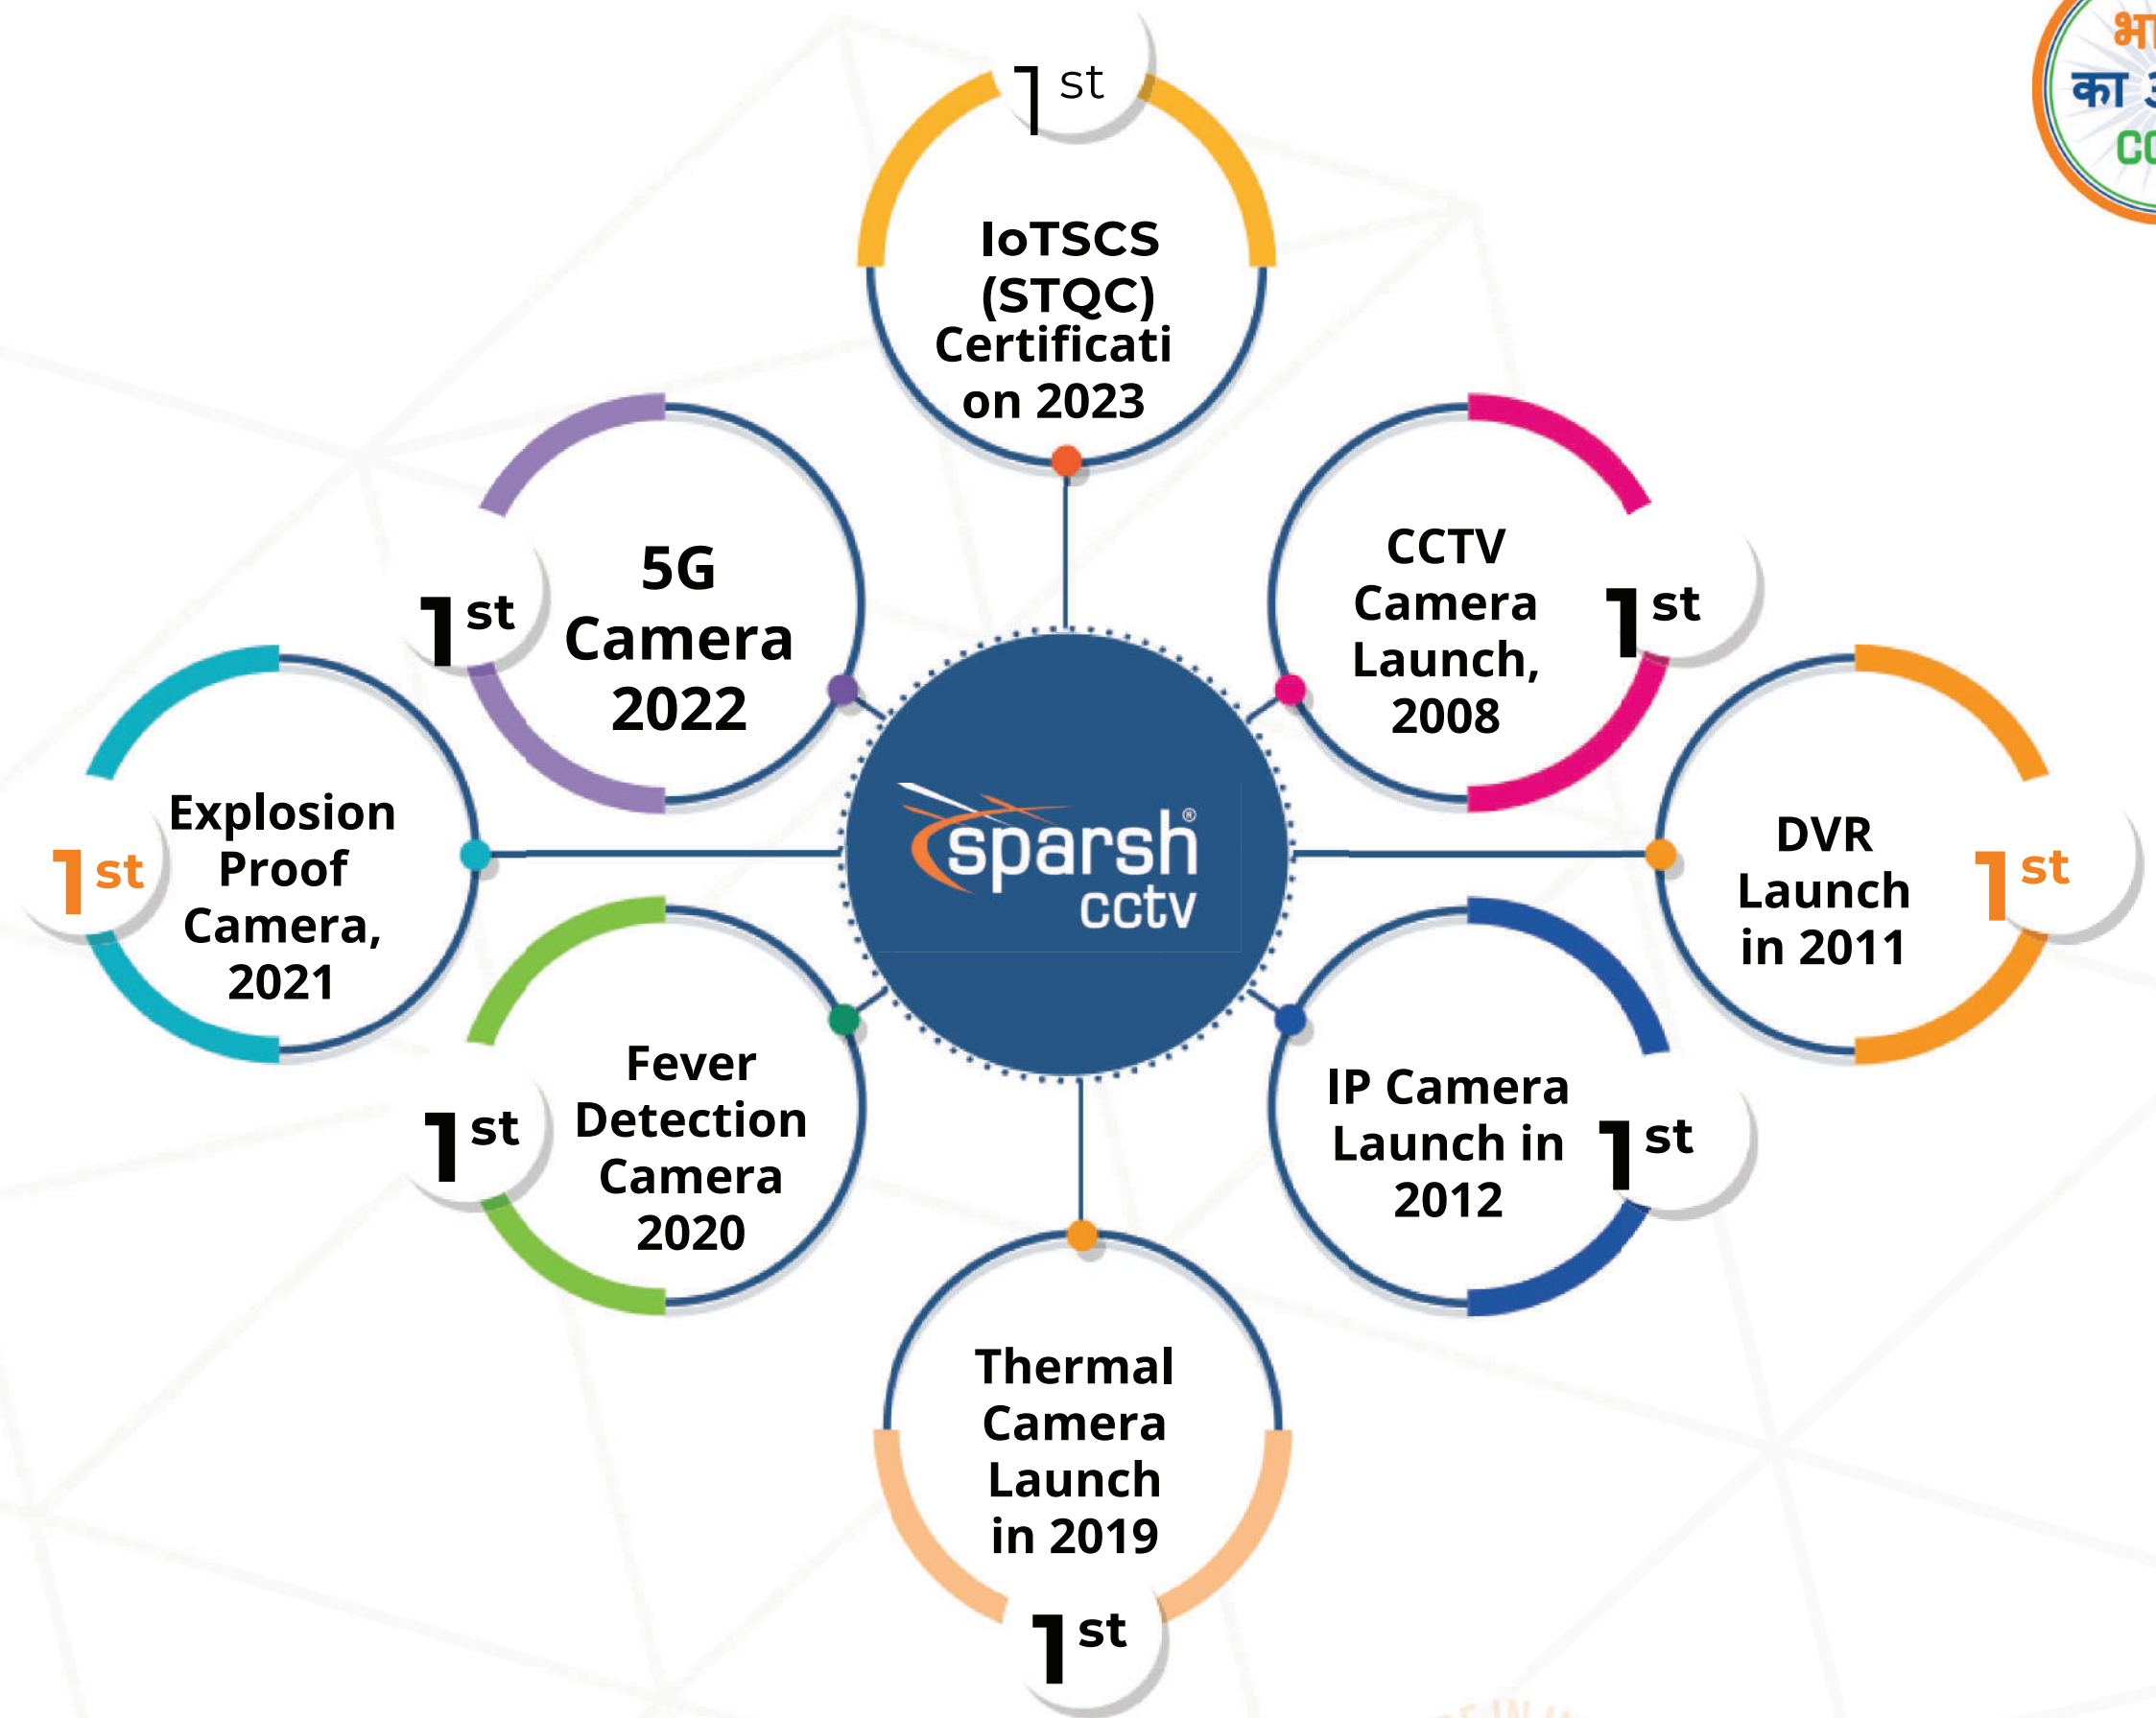

Sanjeev, the driving force behind Sparsh and affectionately known as the "Made in India Man" in the industry, is an innovator and entrepreneur at heart.

He is also the founding Chairman of SPGI (Security Promotion Group of India), Convener of the Video Surveillance Committee on Indian Standards at BIS-LITD 32/Panel 1, representing India in IEC for video surveillance standards, and Chair of the subgroup on PPP - MII in the ICTE Committee in CII. Sanjeev works closely with MeitY, DoT, and DPIIT on electronics and telecom policies related to Make in India, and serves as Chairman of the NoS Committee for Security Surveillance in ESSCI. Additionally, he is the Chairman of the Committee on Intelligent Traffic Information Systems (ITIS) for Urban and Smart Cities.

CUSTOM SOLUTION

Sparsh CCTV Custom solutions allow for enhanced coverage, optimized performance, and tailored analytics, ensuring that security systems are aligned with the operational demands of businesses, whether it's retail, healthcare, manufacturing, or government institutions. This approach maximizes efficiency, enhances response times, and provides more accurate threat detection and management.

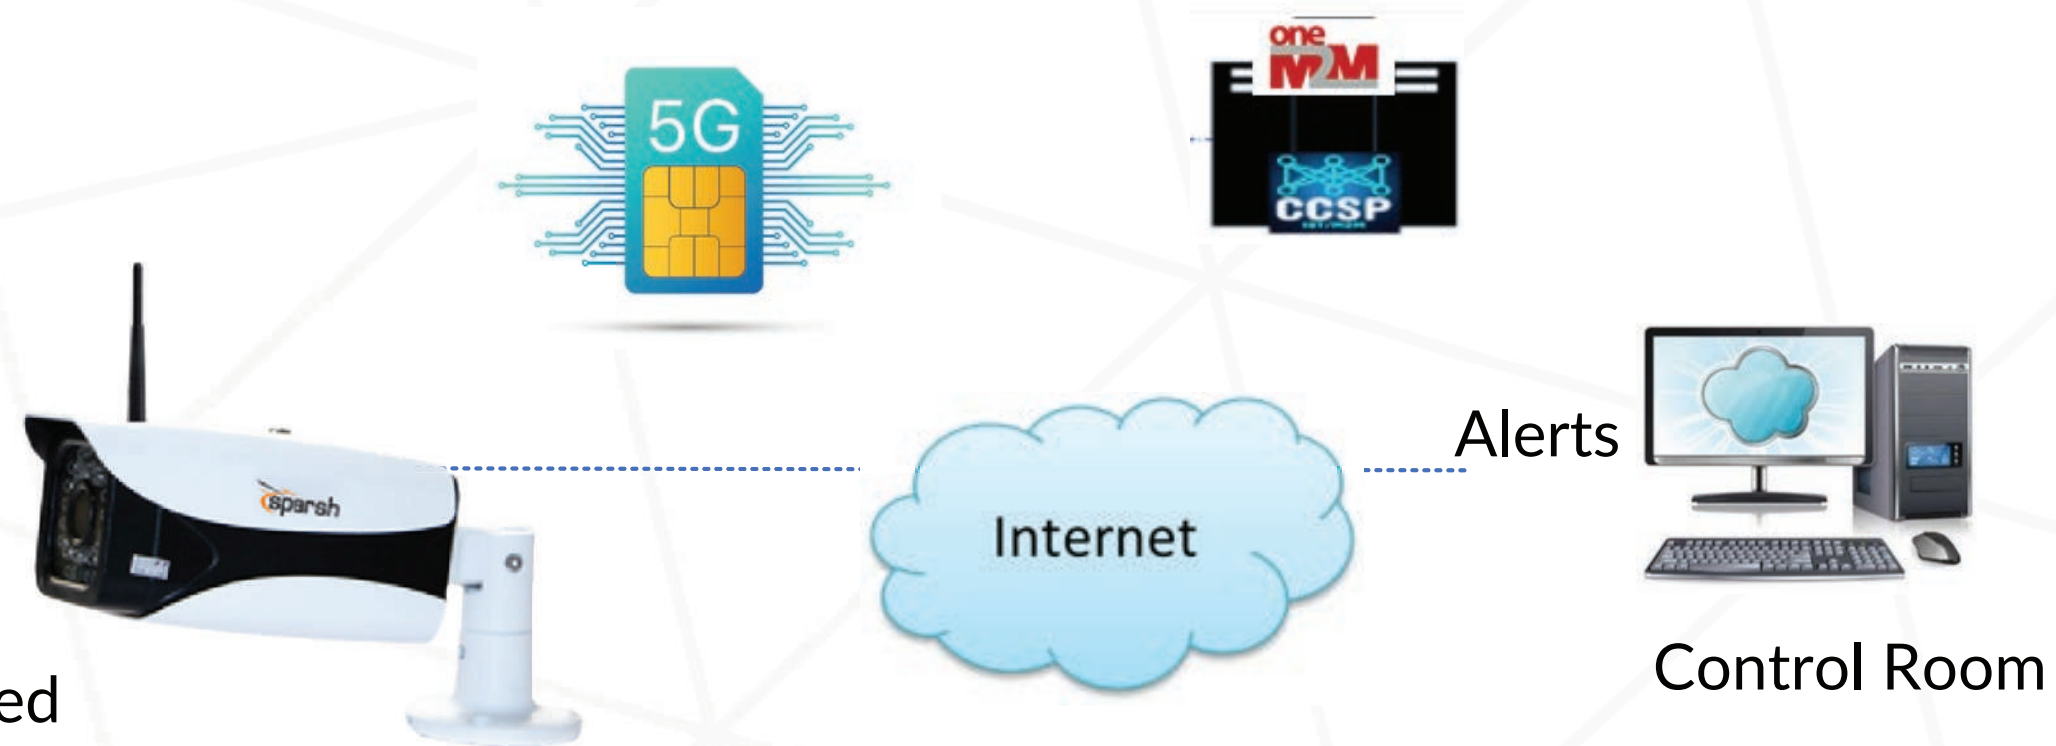

SOLUTION - 5G NETWORK READY CAMERA

This next-generation camera combines sleek design with advanced features, making it ideal for any security need. Proudly 100% “Made in India,” it offers best-in-class technology, robust mechanics, cloud support, and a nationwide network of service centers.

Harnessing the power of 5G, the Sparsh 5G Camera allows seamless wireless video transmission over the internet—simply power the camera and insert a SIM card, eliminating the complexity of cables and fiber connections. Unlike add-on routers, its built-in 5G module enhances deployment mobility, delivering a reliable and flexible security solution.

Key Features:

- Resolution upto 8MP
- On Edge AI
- Lens with Optical zoom 4X/10X
- STARVIS Starlight Sensor
- 100fps for High-Speed Application
- 100m IR Distance
- Sparsh Cloud Platform
- Any third Part platform can be integrated

EMERGENCY CALL BOX (ECB)

SOS Emergency Call Box(ECB) System is an end-to-end solution that helps provide assistance in case of emergency events. It is a robust communication system that comprises of ECBs installed at strategic locations such as railways Station, Inside Coaches ect and connected to a control center for swift emergency response. The call boxes are connected to a central server through 4G/LTE or network of optical fiber cables

Warning by single pressing on the call button

Hands-free Emergency Audio Video calling.

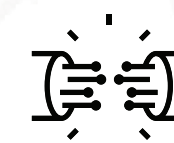

Video Based call management application with a live site map, the calls for help can be served practically from a remote location.

Direct routing to Emergency Service

4G connectivity

The system runs 4G or Ethernet network with fiber optic connectivity

EX-PROOF CAMERAS

Sparsh's explosion-proof camera range is designed for hazardous environments, ensuring safety while delivering high-performance surveillance. The cameras are certified as per the Essential Requirements (ERs) outlined in the Gazette notification, ensuring compliance with government standards for security, data protection, and reliability.
